Contents Vol. 46, 1991

Scientific-Technical Section

Results of test on image matching of ISPRS WG III/4
E. Gülch (Stockholm, Sweden) 1

Multisensor image fusion techniques in remote sensing
M. Ehlers (Orono, Ma., USA) 19

Production and revision of maps using satellite photography from MKF-6, KATE-140, KATE-200 and KFA-1000 cameras
J. Krämer (Leipzig, Germany) 31

Application of the WDVI in estimating LAI at the generative stage of barley
J.G.P.W. Clevers (Wageningen, The Netherlands) 37

Book Reviews

Introduction to Remotely Sensed Data, by B.A. Harrison and D.L.B. Jupp — J.B. Campbell 48

The Design and Analysis of Spatial Data Structures, by H. Samet — M.J. Egenhofer 49

Theory and Applications Optical Remote Sensing, edited by G. Asrar — J.E. Estes 51

Reports Section

Characterization, Propagation, and Simulation of Infrared Scenes Symposium, SPIE Conference – L.S. Balfour and A. Ben–Shalom 54

First Circumpolar Symposium on Remote Sensing of Arctic Environment – A.P. Cracknell 55

ISPRS Commission IV Symposium – G. Schreier 56

10th Annual International Geoscience and Remote Sensing Symposium, IGARSS'90 – G. Schreier 57

Symposium of ISPRS Commission III – Mathematical Analysis of Data – E. Gülch 59

Oceanography from Space – H. Charnock 61

Calendar 65

Scientific-Technical Section

Least-squares methods for surface reconstruction from images
B.P. Wrobel (Darmstadt, Germany) 67

Status and problems of geographical information systems. The necessity of a geoinformation theory
M. Molenaar (Wageningen, The Netherlands) 85

Operational experience in underwater photogrammetry
J.D. Leatherdale (Hadley Wood, UK) and D.J. Turner (Aberdeen, UK) 104

Book Reviews

GSP Satellite Surveying, by A. Leick — R. J. Hintz 113

Compendium Photogrammery, Volume XIX, by W. Marckwardt (Editor) — P. Waldhaüsl 114
Fundamentals of Real-Time Photogrammetry, by E.P. Baltsavias, H.A. Beyer, D. Fritsch and R.K. Lenz — P. Axelsson 114

Reports Section
23rd International Symposium on Remote Sensing of Environment — B.C. Forster 116
10th EARSel Symposium: New European System, Sensors and Applications — M. Hallikainen 117
ISPRS Commission I: Primary Data Acquisition — H.-P. Bähr 118
SPIE 1990 Symposium on Optical and Opto-electronic Applied Science and Engineering — L.L. Endelman 120
Fourth International Symposium on Spatial Data Handling — G. Dutton 123

ISPRS Awards. Conditions 128

Erratum 132

Scientific–Technical Section
Slope visibility and shadows in side-look SPOT imagery
J.J. Nossin (Enschede, The Netherlands) 133
Real-time positioning of moving objects by dynamic target tracking
G. Bayer, P. Krzystek and W. Möhlenbrink (Stuttgart, Germany) 147
Progress in knowledge engineering for image interpretation and classification
N.J. Mulder, H. Middelkoop and J.W. Miltenburg (Enschede, The Netherlands) 161

Reports Section
ISPRS Commission II Symposium: Systems for Data Processing and Analysis — K. Jacobsen 172
ISPRS Commission V Symposium: Close-range Photogrammetry meets Machine Vision — J.G. Fryer 173
ISPRS Commission VI Symposium: Modern Trends of Education and Remote Sensing —
S. Ghosh 175
ISPRS Commission VII Symposium: Global and Environmental Monitoring; Techniques and Impact — G.F. Hart and J.C. Trinder 176

Announcement 183
Obituary 185

Scientific-Technical Section
Use of multitemporal information to improve classification performance of TM scenes

in comples terrain
C. Conese and F. Maselli (Firenze, Italy) 187
Relative and absolute oreintation based on linear features
K. Kubik (Brisbane, Qld., Australia) 199
SPOT 4: a new generation of SPOT satellites
M. Arnaud and M. Leroy (Toulouse, France) 205
Light penetration depth, turbidity and reflectance related relationships and models
D.S. Bhargava and D.W. Mariam (Roorkee, India) 217
Dome representation using photogrammetrically derived data and best fitting techniques
A. Fotiou, E. Livieratos (Thessaloniki, Greece), G. Lombardini (Viterbo, Italy) and I. Paraschakis (Thessaloniki, Greece) 231

Reports Section
Design issue of softcopy photogrammetric workstations — C. Fuchs, ... 247
19th International Congress on high speed photography and photonics — L.L. Endelman 249
13th International symposium on architectural photogrammetry 251

Editorial i
Obituary iii

Scientific-Technical Section
Automatic derivation of skeleton lines from digitized contours
G. Aumann, H. Ebner and L. Tang (Munich, Germany) 259
Rasterstereography and double rasterstereography: two methods for measuring fast dynamic changes of laboratory model surfaces
U. Ethrog (Haifa, Israel) 269
Automatically generating triangulated irregular digital terrain model networks by mathematical morphology
Li Deren and Chen Xiao-Yong (Wuhan, China) 283
National activities in remote sensing: a Canadian perspective
Bruce Howe (Ottowa, Ont., Canada) 296

Reports Section
International Conference on Industrial Vision Metrology—H.A. Beyer 305
11th Symposium of the European Association of Remote Sensing Laboratories—G. Konecny 305

Scientific-Technical Section
A simple method for estimating regional evapotranspiration from infrared surface temperature data
Y. Brunet (Thiverval-Grignon, France), M. Nunez (Hobart, Tasmania, Australia) and J.-P. Lagouarde (Villenave d'Ornon, France) 311

Relating forestry interpreter preference to sensitometric parameters of black and white and normal color aerial films
R.J. Hall and L. Fent (Edmonton, Alta., Canada) 328
URBANIFE: a geographical information system for monitoring internal developments in an African traditional urban area
M. Nkambwe (Gaborone, Botswana) 346
Role of satellite remote sensing in the geographic information economics in France
J. Denègre (Paris, France) 359
